

Visualization Playbook

Enhanced Context Edition with Business Examples

Focus Areas & Color Coding:

- **Good Focus:** High-performing patterns, best practices, success stories
- **Bad Focus:** Poor-performing patterns, common pitfalls, areas needing improvement
- **Important Focus:** Moderate patterns, watch areas, balanced performance
- **Reference Lines:** Benchmarks, targets, trends, and statistical measures

Key Features:

- Each visualization shows realistic business scenarios with meaningful data
- Clear annotations, targets, and performance zones for context
- Statistical measures (correlations, percentiles, outliers) clearly marked
- Business insights and actionable recommendations embedded in charts

Categorical Data Analysis - Good Focus

Department performance analysis with targets and zones

Categorical Analysis - Good Focus

Analysis Notes:

This page focuses on good patterns in categorical data. Features department performance vs targets, budget allocation analysis (Pareto), and performance zones. Shows clear examples of high performers vs underperformers with actionable insights.

Categorical Data Analysis - Bad Focus

Department performance analysis with targets and zones

Categorical Analysis - Bad Focus

Analysis Notes:

This page focuses on bad patterns in categorical data. Features department performance vs targets, budget allocation analysis (Pareto), and performance zones. Shows clear examples of high performers vs underperformers with actionable insights.

Categorical Data Analysis - Important Focus

Department performance analysis with targets and zones

Categorical Analysis - Important Focus

Analysis Notes:

This page focuses on important patterns in categorical data. Features department performance vs targets, budget allocation analysis (Pareto), and performance zones. Shows clear examples of high performers vs underperformers with actionable insights.

Ordinal Data Analysis - Good Focus

Employee satisfaction and education-salary relationships

Ordinal Analysis - Good Focus

Analysis Notes:

This page focuses on good patterns in ordinal data. Demonstrates education-salary relationships, satisfaction surveys with Likert scales, and year-over-year progression analysis. Includes median benchmarks and growth indicators.

Ordinal Data Analysis - Bad Focus

Employee satisfaction and education-salary relationships

Ordinal Analysis - Bad Focus

Analysis Notes:

This page focuses on bad patterns in ordinal data. Demonstrates education-salary relationships, satisfaction surveys with Likert scales, and year-over-year progression analysis. Includes median benchmarks and growth indicators.

Ordinal Data Analysis - Important Focus

Employee satisfaction and education-salary relationships

Ordinal Analysis - Important Focus

Analysis Notes:

This page focuses on important patterns in ordinal data. Demonstrates education-salary relationships, satisfaction surveys with Likert scales, and year-over-year progression analysis. Includes median benchmarks and growth indicators.

Quantitative Data Analysis - Good Focus

Sales performance with cost analysis and outlier detection

Quantitative Analysis - Good Focus

Analysis Notes:

This page focuses on good patterns in quantitative data. Shows performance vs cost analysis with optimal zones, revenue distribution with percentiles, and cost outlier analysis. Includes correlation analysis and statistical boundaries.

Quantitative Data Analysis - Bad Focus

Sales performance with cost analysis and outlier detection

Quantitative Analysis - Bad Focus

Analysis Notes:

This page focuses on bad patterns in quantitative data. Shows performance vs cost analysis with optimal zones, revenue distribution with percentiles, and cost outlier analysis. Includes correlation analysis and statistical boundaries.

Quantitative Data Analysis - Important Focus

Sales performance with cost analysis and outlier detection

Quantitative Analysis - Important Focus

Analysis Notes:

This page focuses on important patterns in quantitative data. Shows performance vs cost analysis with optimal zones, revenue distribution with percentiles, and cost outlier analysis. Includes correlation analysis and statistical boundaries.

Temporal Data Analysis - Good Focus

Revenue trends with growth analysis and business events

Temporal Analysis - Good Focus

Analysis Notes:

This page focuses on good patterns in temporal data. Revenue trends with moving averages, profit margin analysis with targets, and year-over-year growth with business events. Features seasonality and trend identification.

Temporal Data Analysis - Bad Focus

Revenue trends with growth analysis and business events

Temporal Analysis - Bad Focus

Bad: Profit Margin Over Time

Bad: Year-over-Year Growth Analysis

Analysis Notes:

This page focuses on bad patterns in temporal data. Revenue trends with moving averages, profit margin analysis with targets, and year-over-year growth with business events. Features seasonality and trend identification.

Temporal Data Analysis - Important Focus

Revenue trends with growth analysis and business events

Temporal Analysis - Important Focus

Important: Year-over-Year Growth Analysis

Analysis Notes:

This page focuses on important patterns in temporal data. Revenue trends with moving averages, profit margin analysis with targets, and year-over-year growth with business events. Features seasonality and trend identification.

Relational Data Analysis - Good Focus

Network connectivity analysis with centrality measures

Network Analysis - Good Focus

Analysis Notes:

This page focuses on good patterns in relational data. Network connectivity analysis with centrality measures, flow diagrams, and hub identification. Shows relationship patterns and influence mapping in business networks.

Relational Data Analysis - Bad Focus

Network connectivity analysis with centrality measures

Network Analysis - Bad Focus

Bad: Network Structure

Bad: Flow Analysis

Bad: Centrality Analysis

Analysis Notes:

This page focuses on bad patterns in relational data. Network connectivity analysis with centrality measures, flow diagrams, and hub identification. Shows relationship patterns and influence mapping in business networks.

Relational Data Analysis - Important Focus

Network connectivity analysis with centrality measures

Network Analysis - Important Focus

Important: Network Structure

Important: Flow Analysis

Important: Centrality Analysis

Analysis Notes:

This page focuses on important patterns in relational data. Network connectivity analysis with centrality measures, flow diagrams, and hub identification. Shows relationship patterns and influence mapping in business networks.

Spatial Data Analysis - Good Focus

Regional performance with geographic and heatmap analysis

Spatial Analysis - Good Focus

Analysis Notes:

This page focuses on good patterns in spatial data. Geographic performance analysis with choropleth maps, proportional symbols for volume, and regional performance heatmaps. Includes per-capita normalization and threshold analysis.

Spatial Data Analysis - Bad Focus

Regional performance with geographic and heatmap analysis

Spatial Analysis - Bad Focus

Analysis Notes:

This page focuses on bad patterns in spatial data. Geographic performance analysis with choropleth maps, proportional symbols for volume, and regional performance heatmaps. Includes per-capita normalization and threshold analysis.

Spatial Data Analysis - Important Focus

Regional performance with geographic and heatmap analysis

Spatial Analysis - Important Focus

Analysis Notes:

This page focuses on important patterns in spatial data. Geographic performance analysis with choropleth maps, proportional symbols for volume, and regional performance heatmaps. Includes per-capita normalization and threshold analysis.
