EDUCATION

Chapman University, George L. Argyros School of Business & Economics – Orange, CA

Master of Science in Business Analytics | 2025 – Present

- Machine Learning for Managers (BUS 659): Applied regression, classification, and tree-based models in R/Python to solve business problems.
- Managing Data for Analysis (BUS 671): Developed SQL/NoSQL skills for data extraction, transformation, and enterprise analytics.
- Data Visualization for Business (BUS 672): Created executive dashboards and data stories using Tableau, ggplot, seaborn, and plotly.
- Statistical Machine Learning I (CPSC 540): Advanced modeling (Bayesian, GLMs, time series) with focus on ethical predictive analytics.

Chapman University, Fowler School of Engineering – Orange, CA

Bachelor of Science in Computer Science, Minor in Analytics | 2017 – 2021

EXPERIENCE

Reliance Steel & Aluminum Co. – Cypress, CA

Data Engineer | Jan 2023 – Present

- Increased operational reliability through multiple monitoring dashboards and automated alerts, ensuring proactive resolution of data errors.
- Improved data reliability by applying advanced anomaly detection to identify and fix pipeline errors proactively.
- Unified fragmented data ecosystem across 82 companies and 533 locations by building and optimizing cloud-based pipelines using AWS (Lambda, Glue, Athena) and Snowflake, enabling enterprise-wide analytics and faster decision-making.
- Solved cross-system inconsistencies by consolidating purchase order data from five ERP systems into a unified Snowflake warehouse through iterative collaboration with subject matter experts to refine data mappings.

PartnerBO (Garniek Group) – Remote / Client Sites

Developer / Consultant – Informatica | Aug 2021 – Jan 2023

- Led technical framework overhaul for a leading mortgage insurance company as Acting Technical Lead, modernizing legacy systems to improve processing efficiency.
- Delivered an enterprise file ingestion service, handling multiple file formats (delimited, positional, complex) with embedded parsing, reducing processing time for large datasets.
- Streamlined deployment processes by designing Mapping Task Flows, Linear Task Flows, and Parallel Task Flows in Informatica Cloud.
- Reduced integration errors by implementing advanced transformation pipelines (multi-format parsing, mapping, serialization).

- Collaborated with onshore and offshore teams to ensure seamless project delivery and mentored new hires through Informatica Enablement Courses.

Melissa Data – Rancho Santa Margarita, CA

Data Quality Tools Intern | Jun 2021 – Aug 2021

- Enabled phone verification service launch by processing large data volumes for multiple REST API phone services.
- Improved API reliability through comprehensive unit testing in C# for Unison Web API and enhancements for Personator REST API.
- Increased accuracy in production systems by implementing data standardization strategies for address and PII information.

PROJECTS

Redfin Real Estate Analysis

- Developed predictive models for rental property investment optimization using web scraping, analyzing property prices, mortgage costs, and rental income.
- Validated models with subject matter experts and refined financial assumptions.
- Provided investors with recommendations by comparing ROI metrics across properties.

Titanic – Machine Learning from Disaster

- Applied feature engineering and multiple modeling techniques (Logistic Regression, Random Forest, K-Nearest Neighbors) using Python's scikit-learn and pandas.
- Improved predictive accuracy and streamlined workflows for data preprocessing.

Rosetta Stone User Data Analysis

- Increased retention potential by segmenting users into three classifications based on engagement and value.
- Designed targeted growth strategies by analyzing user behavior and tailoring subscription plans.

DISTINCTIONS

Technical Skills:

- Cloud & Data Platforms: AWS (Lambda, Glue, Athena), Snowflake, Informatica (PowerCenter, B2B Suite, IICS, IDMC, Axon, IDQ, EDC)
- Programming & Analytics: Python, R, SQL, C#, Statistical Analysis, Predictive Modeling
- Visualization Tools: Tableau, Power BI, Streamlit, ggplot (R), plotly (Python)
- Development Methodologies: Agile (Kanban, Scrum), Waterfall, SDLC

Languages: English (Native)

Interests: Financial analysis, Applied Use Cases, Predictive Modeling
